

28. (New) The method of claim 1, wherein the subscriber number profile contains data for all subscribers registered in the home mobile radio network.

29. (New) The method of claim 1, wherein the subscriber number profile contains a plurality of valid call numbers.

In the abstract:

Please delete the paragraph starting at page 19, line 5.

Insert the following paragraph starting at page 19, line 5.

-- Controlling a call connection in a mobile communication system includes storing, in a subscriber database, subscriber-oriented data and subscriber profile data for a subscriber registered in a home mobile radio network, entering the subscriber-oriented data and the subscriber profile data in a visited radio network database when the subscriber moves, and setting-up a call connection for the subscriber with a mobile station using a mobile switching center coupled to the visited subscriber database. --
